

Vertical Blind System Silent Gliss 2810  
with Vertical Waves

## Silent Gliss Vertical Blind Systems

## Discover the Elegance

Vertical Blinds are probably the best systems for exact light control. Perfect for floor to ceiling applications or smaller installations, inside or outside recess.

A very contemporary look with an elegant touch – Silent Gliss, together with Swedish textile designer Eva Marmbrandt developed exclusive designs for vertical louvres: the Vertical Waves.

### **Quality and warranty**

All materials used for our vertical blind systems are rust free and UV resistant for perfect functionality and appearance over time. Extensive testing and a 5 year warranty are self evident in our high quality product range.

### **Precision**

Our experienced specialists assemble every system manually to guarantee a precise and smooth operation – day after day!

### **Operating comfort**

Our systems offer the perfect operation for every need – chain, crank or electric operated.

### **Custom made**

All our systems are made to measure in relation to window dimensions and customer needs.

## Function, Comfort and Design

The perfect interaction between functionality and design – all our vertical blind systems offer the most comfortable operation possibilities and are true eye-catchers.

Vertical blind system 2810  
chain operated,  
max. length 5 m

Vertical blind system 2900  
crank operated,  
max. length 6 m

Vertical blind system 2950  
electrically operated,  
max. length 6 m

### Comfort at your fingertips

System 2950 can be operated from the comfort of your seat with the Silent Gliss Remote Control System 9940 – for the ultimate in ease of operation.

### Sloped and curved

Not only are all vertical blind systems bendable down to 50 cm, systems 2900 and 2950 can even be used for sloped applications.

## Vertical Waves – A contemporary Design for Vertical Blinds

Vertical Waves are a series of laser cut vertical blinds adjusted to suit modern architecture.

They create a striking interior environment with unusual lighting and acoustic effects, and make it possible to partition off areas within a room. Three unique designs for our vertical blind systems are available.

**Eva Marmbrandt**

Textile designer MFA, Sweden  
Degree from the College of Arts,  
2004, Stockholm

“My goal is to consolidate and develop the significance of textiles in public environments. During the last few years I have focused on developing new materials and forms in the area of vertical blinds, where I exploit the unique advantage that this system offers to designers.”

**Annika: thorns, stormy seas...**

Sharp edges create special lighting effects for an unusual experience.

Laser cut polyester fabric, width: 125-230 mm  
(127 mm louvres only)

**Andrea: snowdrifts, howling wind, spring shoots...**

This design has soft forms which create the effect of shifting light through different degrees of transparency.

Laser cut polyester fabric, width: 125-250 mm  
(127 mm louvres), 89-178 mm (89 mm louvres)

Maria: soft waves, rippling, running water...

Inspiration comes from a frozen winter landscape,  
with wind-driven snowdrifts and vegetation still hidden  
beneath the snow.

Laser cut polyester fabric, width: 125-250 mm  
(127 mm louvres), 89-178 mm (89 mm louvres)

A close-up photograph showing the texture of two different fabrics. One fabric is a light beige or off-white color with a fine, woven texture. The other fabric is a deep, rich red or burgundy color, also with a visible weave. The fabrics are draped and folded, creating soft curves and shadows that emphasize their tactile qualities.

## The Fabrics

When combined with fabrics from our exclusive collections, our systems offer the perfect interaction between functionality and design. All of our vertical blind fabrics have been thoroughly tested and are guaranteed to look stunning in every room.

More than 20 fabrics in 200 variations provide wonderful textures and colours, together with exciting patterns.

The fabric Visiotex is exclusively available for the Vertical Waves – ensuring the perfect hanging of the louvres.

# Overview of Systems and Options

Operation	Dimensions	Applications						Profile		Features / Options						System
		Single Stack	Pair Stack	Multiple Stack	Asymmetric Stack	Sloping	Heavy Duty	Special Recess Profile available	Min. Bending Radius (mm)	Various Motor Options	Design Case	Radio Control	Louvre widths (mm)	Mono Operation	Vertical Waves	
	5 m	●	●	●	●			●	750		●		89 127	●	●	2810
	6 m	●	●	●	●	●	●	●	500		●		89 127	●	●	2900
	6 m	●	●	●	●	●	●	●	500	●		●	89 127	●	●	2950
