

**SZ-MSW Series (tensioned zip):**

**SZ-MSW Sideways:**

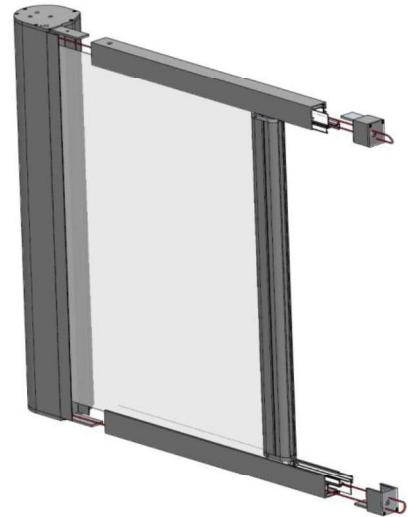

Guillaume Janssen introduced during the R+T in 2015 the first sideways running ZIP system. For this innovative product we were nominated for "*Innovationprice R+T 2015*".

The main advantage (apart from large widths) is that the visual obstruction is being kept to a minimum due to a small top and bottom track.

**Maximum height: 3000 mm**  
**Maximum width(draw): 10000 mm**

**Reference SZ-MSW Sideways: The Netherlands**

Two sideways systems running towards each other to cover the entire glass structure of a private swimming pool. The shading systems provide privacy and protection against UV and insects. (dimensions: 9000 mm. x 2500 mm.)

**SZ-MSW Series (tensioned zip):**

**SZ-MSW Sideways Curved:**

Curved variant of the straight sideways ZIP System, providing the only screen solution for curved glass structures. For all the applications see also the previous page at the (straight) sideways ZIP.

*Reference SZ-MSW Sideways Curved: The Netherlands*

Sideways curved ZIP system running from right to left, perfectly following the curved glass structure.
