safe timeless beautiful

**markilux 930 | The Mobile One** This awning moves differently from the rest, because as you retract the markilux 930, the awning pivots into a horizontal position and disappears below the soffit. When extended, the angle of pitch can be set at up to 80 degrees – so if required, the awning can pivot almost to the vertical. The markilux 930 is perfect for all balconies and eaves that require no additional protection of the awning or awning cover. This awning allows you to enjoy being outside in the evening even when the sun is low in the sky.

#### **Dimensions**

max. 500 cm × 300 cm

#### **Folding arm**

twin steel-link chains

#### **Options**

valance

**Pivoting mechanism** The just 122 mm high awning structure disappears discreetly under the soffit, when retracted. Only during the extension process does the markilux 930 pivot to the desired angle.

**Valance** This additional decorative finish to the front profile lends the perfect balcony awning individual charm.
