safe timeless beautiful

**markilux Shadeplus** The additional vertical blind integrated into the front profile simply blocks out low-lying sun and the glances of inquisitive neighbours.

**LED line** Light for reading or informal get-togethers, optionally in the guide tracks and / or in the cover support tube, turns your night into day.

**LED spotlights attached to the cover support tube**  
These spotlights will provide perfect contrast lighting in the evening hours, pivoting and dimmable.

**Adjustable post** For better water drainage, the front post of the markilux pergola can be lowered in a flash between 20 and 40 cm depending on the size.

**markilux pergola | The Resolute One** The markilux pergola ranks top when it comes to solar and wet weather protection. The awning system on slender posts and lateral guide tracks provides generous shading with an extension of up to 6 metres. The markilux pergola defies wind and weather up to Beaufort 6 (wind resistance class 3). You can make this awning your own with a markilux Shadeplus, an array of lighting options and post variants.

No matter how strong the sun shines or the wind blows, with your markilux pergola you can enjoy life outdoors at any time.

# markilux pergola – options

**Closed full cassette** The cover disappears completely inside the cassette and is ideally protected. If anything can be more beautiful than the appearance of the awning, it is the way the markilux pergola functions faultlessly.

**markilux tracfix** One of markilux's many sophisticated features: the lateral cover guidance system without a gap between the cover and guide track. For a more beautiful overall appearance and better wind stability.

**markilux sundrive** An integrated solar panel drives the Shadeplus motor for the markilux pergola. When the awning is extended the front profile and the guide tracks finish perfectly flush with one another.

**Square posts** As an alternative to round posts, square ones fulfil the desire for clean straight lines.

**Stabilisation boxes** Give your markilux pergola reliable stability, when fitting the front posts to foundations is not possible or desired.

**Stainless steel crank** Bring the adjustable posts to the desired height in no time at all.
