

Lamaxa Moments

The new Lamaxa L50 Tex

Der SonnenLichtManager

Lamaxa Moments

It's different when it's yours.

Enjoy life outdoors – your Lamaxa L50 Tex makes it possible. The slender, cubic roofing design is your most attractive protection from the sun. And in the water-resistant version from the rain as well.

Choose individuality, elegance and maximum comfort: your Lamaxa L50 Tex creates a new attitude to life.

My Lamaxa Moment

Light and vibrant fabrics

If we go through life with our eyes wide open, we are rewarded with new impressions and ideas. I have a passion for fabrics, designs, arrangements, surfaces, feel, harmonies and contrasts. That's why I love my Lamaxa L50 Tex with fabric curtains so much. It embodies all my preferences for creativity, architecture and conceptual design.

Discover new combinations.

Life outdoors – no matter what the weather: My Lamaxa makes it possible. I chose the waterproof version of the textile roof. This gives me the most beautiful sun and rain protection at the same time. The water runs off invisibly through an integrated system. And when the days get cooler, I close the open sides and switch on the radiant heater.

Sometimes, I think my clients only visit me because of my Lamaxa. But I'm sure that's just my imagination. Or is it?

The Lamaxa equipment

Your personal Lamaxa L50 Tex

Your Lamaxa L50 Tex is the slender roof covering with motor-controlled textile roof. You can have your Lamaxa installed on your building wall or leave it free-standing. With this roof system, you create a wind-stable outdoor space. With the Lamaxa L50 Tex, you can choose your retractable and extendable fabric curtain indifferent colours and designs - as a pure sun roof or as a water-resistant roof with integrated water drainage system. The textile roof is safely guided using the secudrive® guide technology. Look forward to your new favourite outdoor space.

The Lamaxa L50 Tex is setting new standards in equipment and personalisation options. With the WMS radio remote control, the roof, the lighting, the vertical shading and the radiant heater can be conveniently operated via hand-held transmitter or smartphone with WMS WebControl pro. The textile curtain can also be raised and lowered fully automatically depending on weather, temperature or solar radiation.

Choose from our wide range of weather-resistant colour coatings and fabrics. Expand your Lamaxa with dimmable LED and RGB lighting, with the up to 6 m wide vertical GranTex awning, elegant glass, wooden or aluminium sliding elements or with warming Design radiant heaters.

-  Flexible sun shading system
-  Wind-stable
-  Protection against rain
-  Automatable
-  Customisable
-  Extendable

reddot winner 2021

1 Colour selection
According to WAREMA Colour World with many options to choose from and high-grade fine texture surface, (resistant to external influences such as dirt, scratches)

2 Sliding elements
Wooden, aluminium and glass sliding systems can be manually moved horizontally

3 Design radiant heater
Infrared short wave radiator with tinted glass ceramic for wall installation

4 LED and RGB lighting

GranTex awning with easyZIP guidance up to 6 m in width precisely fitted into the frame of the slat roof

6 Drainage gutter
The centrally positioned drainage gutter ensures defined drainage of the water

7 Textile roof
Movable fabric curtain from pure sun shading system (acrylic qualities) or as a weatherproof version (Sunworker Top) with integrated drainage grid

8 Weather station
Gathers weather data such as wind speed, solar radiation, temperature, precipitation and enables automatic control of the Lamaxa

9 Water drain
Integrated in the freely selectable pole

10 WMS Radio motor
Flexible operation with WMS Web Control via smartphone or with a WMS Hand-held transmitter

Lamaxa L50

The Features

Experience exclusive Colour Worlds

The WAREMA Colour World is available for all powder-coated aluminium parts such as slats and profiles. WAREMA offers a large selection of powder colours. Choose from the three colour categories "Highlight", "Variation" or "Individual" – always including a high-grade fine texture surface.

Weather station

You can combine your Lamaxa L50 Tex with the WMS Weather station. Your Lamaxa slats will then tilt or its fabric curtain will move fully automatically depending on the weather. So you and your furniture are protected even if the weather suddenly changes. With the Smart Living package control package including remote control.

Control via remote control or app

The Lamaxa is operated via the WMS radio system. Upon request, it is possible to operate the Lamaxa via a smartphone, WMS WebControl pro or Amazon Alexa. This means you can conveniently control slats, awnings, lighting, radiant heaters, and much more. Already included in the Smart Living package.

Elegant wooden and aluminium sliding shutters

Wooden (larch ecru) or aluminium lateral sliding shutters create elegant design accents. The aluminium shutters can be coated to match the frame or in a contrasting colour.

High-grade glass sliding system

Lateral glass sliding systems (for example Solarlux glass sliding system SL20e) offer you additional transparent protection against wind and cold with a view out at the same time.

GranTex with easyZIP guidance

They combine modern design with functional safety. The intelligent lateral guidance guarantees exceptional stability and a firm hold even in strong winds.

A responsibility for nature and people.

Feel-good atmosphere with the design radiant heater

Even if the temperature drops late in the evening, with the infrared short wave radiant heater (in a colour matching your Lamaxa) with tinted glass ceramic and a power of 2,200 Watts, you can enjoy yourself under your Lamaxa for even longer.

All-round dimmable LED lighting

The LED strips can be individually controlled with the WMS dimmer. They can be installed horizontally to create the perfect lighting mood in the evenings as either direct and/or indirect lighting. RGB lighting can be used as an indirect lighting option.

We understand sustainability to mean holistic responsibility: ecological, economic and social. That's why we aren't just focusing on climate and environmental protection. We always keep an eye on the people who live with our products. The colleagues who work with us. The regions in which our production is based.

Since being founded in 1955, we have been creating sun shading solutions of the highest quality which, thanks to their durability, conserve valuable resources helping to reduce heating as well as cooling energy and thus save costs.

Movable sun shading product as a WeatherEdition or sun shading system

The rainproof fabric quality Sunworker Top keeps the rain out so that the area beneath the roof stays dry. The drainage grid embedded in the fabric allows the water to drain away into the drainage gutter below in a controlled manner. Alternatively, the Acryl Standard, Lumera or Perfora fabrics are also available as a sun shading solution.

More Lamaxa solutions

Lamaxa L50

Your elegant slat roof with controllable aluminium slats

Your Lamaxa slat roof L50 is the slender roofing choice consisting of pivotable slats and offers you almost year-round sun shading and weather protection. The incidence of light and weather protection can be precisely regulated with the pivotable slats until your slat roof closes completely.

Lamaxa L50 View

Your design patio roof with a glass covering

The Lamaxa L50 View offers you maximum transparency with a glass roof. It elegantly shows off a cubic design. You can choose between an additional internal or external Climara conservatory awning for shading.
